Who it is for

People or teams whose situation matches the product scope and current release state.

Need / job

Test embodied-agent systems for failures that ordinary chatbot evaluations miss.

What the buyer gets

TSLP test/simulation/learning/patch plan; 19 executable reference tests; 10,000-case deterministic simulation design and receipt; 15 red-team cases; anthropomorphic-authority and emotional-pressure probes; replay, stale-target, authorization-mismatch and adapter-bypass tests; child/dependency, voice/likeness, degraded-mode and network-loss checks; promotion and residual-risk gates.

Q spine / source basis

QF-04 | Q Verify; Q10_FACTORY_V3_1; PUBLIC_ARTIFACT_EDITION; live Shopify product QP-085

Required proof / next evidence gate

19 executable reference tests and a 10,000-case deterministic simulation are included. Local deterministic testing is not field evidence, independent TEVV, security certification, robotics qualification, or a safety guarantee.

Boundary / what this does not prove

Local deterministic testing is not field evidence, independent TEVV, security certification, robotics qualification, or a safety guarantee.

Important

This buyer / decision specification is generated from the controlled Q10 catalog and current live Shopify product record. It is not independent certification, production authorization, legal/medical/financial advice, or proof that a digital delivery attachment is live. Current product page, evidence state, delivery state, version and human release gate remain controlling.
